(Level 6)

The State Health Care
Assistant Diploma
(Level 4)

The State diploma is
obtained by the validation
of 180 ECTS
(Level 6)

Healthcare assistants are authorised to provide day-to-day care or acute care in order to preserve and restore the continuity of life, well-being and autonomy of the individual, taking into account the relational dimension of care. The health-care assistant provides care under the supervision of the nurse.

10 months of competencies based training
9 competencies
22 weeks of theoretical courses (VET)
22 weeks of practical training (internship)
80 students per year

Nurses assess a person's state of health and analyse care situations ; they provide preventive/educative, curative or palliative care. There are specialities open to nurses with a state nursing diploma : operating theatre nurse, anaesthetist nurse, nursery nurse, supervisors and trainers in nursing training institutes, Advanced Practice Nurse.

3 years of competencies based training
10 competencies
60 weeks of theoretical courses (training institute)
60 weeks of practical training (internship)
115 students per year

The medical electroradiology manipulator works in close collaboration with and under the supervision of a radiologist. They carry out medical imaging procedures. They are also responsible for injecting diagnostic and therapeutic products where necessary, and for preparing the examination room and instruments where necessary. He or she also plays a role in the clinical monitoring of patients during examinations and supervises the equipment.

3 years of competencies based training
10 competencies
60 weeks of theoretical courses (training institute)
60 weeks of practical training (internship)
20 students per year

The IFPS has premises and equipment that enable students to learn new technologies through a multitude of mediums : clinical laboratories for simulating medical practices, computer rooms, WiFi access, interactive equipment, ...
The institute works closely with other healthcare institute and the University of West Brittany on the development of e-learning training modules and other pilot projects.

The students participate to various social or educative activities. The Students's association is very active on supporting the students and organising festive and also humanitarian events.

The Healthcare Professionals Training Institute of Quimper, has been awarded a charter for the **ERASMUS+ Mobility Program**. The IFPS is a hands-on learning institution that values intercultural exchange in an open and welcoming spirit.

Institutional exchanges objectives:

- Adopt a project-based approach
- Develop intercultural skills
- Favor the mobility of young European people and develop a sense of European citizenship
- Better understand the realities and the stakes in the healthcare sectors for professionals at the European and international levels
- Discover different health and trainings systems
- Acquire new nursing skills for caring for patients
- Learn to communicate and to progress in another language

Our institute is a member of the **BMouve Consortium** (Bretagne-Mobilité vers l'Europe) of the Regional Council of Brittany, which brings together vocational training establishments in the health and social field.

BMouve's objectives are to strengthen the European dimension of Brittany's establishments, increase mobility to Europe and improve the quality of preparation, follow-up and promotion, improve the quality of training through exchanges between European professionals, mobilise new establishments and create links between establishments.
